## Introduction

With over 8 years of extensive experience in software design, development, and integration, I am a highly skilled professional dedicated to crafting cutting-edge solutions for the future. Armed with advanced knowledge of various programming languages and frameworks, I thrive on architecting robust systems with impeccable code bases and captivating UI/UX designs. My forte lies in meticulous planning and a penchant for staying ahead of the curve by embracing emerging technologies and programming languages.

With a proven track record of leading high-performing teams, I excel in fostering collaboration, nurturing talent, and achieving project success. My proficiency in cutting-edge AI tools such as GitHub Copilot and JetBrains AI empowers me to streamline development workflows, enhance code quality, and drive innovation.

## Technical Proficiencies:

- **Languages & Frameworks:** JavaScript, TypeScript, React, React Native, Redux, Node.js, Express.js, Angular, AngularJS
- **Tools & Technologies:** Webpack, Material UI, React Native Elements, Twilio
- **Backend Development:** PHP, Laravel, CodeIgniter
- **Databases:** MongoDB, MySQL, Snowflake
- **Version Control:** Git & SVN

## Key Skills & Abilities:

- **Team Leadership:** Demonstrated ability in team leadership, fostering collaboration and driving project success.
- **Strategic Planning:** Proven track record in strategic planning and implementation, ensuring efficient project execution.
- **Problem Solving:** Exceptional problem-solving skills, adept at tackling complex issues with innovative solutions.
- **Database Design:** Proficient in database schema design, ensuring robust and scalable data architecture.
- **Performance Optimization:** Skilled in application optimization techniques to enhance performance and user experience.
- **Debugging Expertise:** Utilize advanced debugging tools such as IntelliJ, Webstorm, and React Dev Tools to troubleshoot and resolve issues efficiently.

## **Professional Experience**

### **Capgemini, Noida**

*Technical Lead | Sr. Software Engineer, Dec 2020 to Present*

- Part of a team of highly skilled engineers, to handle a project built on React.
- Modified existing software to correct errors to improve performance.
- Contributed in developing and programming new features for the UI framework developed by a dedicated team.
- Collaborated with other developers to identify and alleviate number of bugs and errors in software.
- Lead a team of 12 engineers to develop a UI Frameworks for two leading clients and handled cross team communications.

### **Chetu India Pvt. Ltd., Noida**

*Technical Lead | Sr. Software Engineer, April 2019 to November 2020*

- Enhanced software performance and adapted it to new hardware by correcting errors and making necessary modifications.
- Developed projects with React and ExpressJS, utilizing TypeScript for efficient scripting.
- Updated project documentation and documented technical workflows to facilitate seamless onboarding of new team members.
- Debugged and optimized AngularJS components to ensure smooth functionality.
- Built, tested, and deployed scalable software products using BitBucket for version control and Jira for issue tracking and testing, while collaborating closely with clients to define project specifications and system designs.

### **iQuinceSoft, Mathura**

*Sr. Software Engineer, April 2018 to April 2019*

- Developed cross-platform mobile applications, optimizing performance and user experience for the software industry.
- Modified and maintained software to rectify errors, adapt to new hardware, and enhance overall performance.
- Collaborated with developers to identify and resolve software bugs, ensuring smooth operation of applications.
- Implemented innovative systems for efficient data collection, storage, and management of customer orders.
- Developed object-oriented software, including JavaScript and Laravel plugins, contributing to project success while managing a team of 6 developers to foster collaboration and resolve issues effectively.

## **Akshar IT Solution, Mathura**

*Sr. Web Developer, Feb 2017 to Jan 2018*

- Trained new developers and programmers on company standards for design and review.
- Established compatibility with third party software products by developing program for modification and integration.
- Provided methodologies for object-oriented software development and efficient database design.
- Developed databases, programs and processes for integration and implementation of the system.
- Created and implemented development strategies for impactful projects.
- Launched BachatLal Online Services in Mathura as head of a 3-person team.

## **Technosters Technologies Pvt. Ltd., Agra**

*Web Developer (Remote), Feb 2016 to Jan 2017*

- Conducted initial client assessments and analysis, initiating research processes effectively.
- Managed the design of dynamic widgets for both web and app development, enhancing user experience.
- Analyzed and designed relational databases using MySQL, ensuring efficient data management.
- Developed, modified, and rigorously tested codes and scripts using NetBeans IDE for optimal application performance.
- Collaborated with a team of engineers to design and develop management-based and e-commerce software solutions, fostering effective teamwork.

## **Educational Qualifications**

- **High School**  
*Prasad Public School, Mathura | 2011-2012*
- **Intermediate (Physics, Chemistry & Mathematics)**  
*Prasad Public School, Mathura | 2013-2014*
- **PHP & Web Development Training**  
*Info Era Technology, Mathura | 2015*
- **Bachelor of Computer Applications**  
*Monad University, Hapur | 2014-2017*
- **Master of Computer Applications (MCA)**  
*Swami Vivekananda Subharti University, Meerut | 2020-2023*

## Top Projects

### Fabric

Fabric is a cutting-edge UI framework meticulously crafted to elevate the user interface experience within React applications. Developed with a focus on performance, flexibility, and seamless integration, Fabric empowers developers to effortlessly create sleek and responsive user interfaces. With its modular architecture and extensive component library

- **Technologies Used:** React and Material UI.
- **Responsibilities:** Team Lead and React Engineer.

### Veneer

Veneer is a sophisticated UI framework meticulously engineered for React applications within the HP Software ecosystem. Designed with a focus on seamless integration, performance, and user-centric design principles, Veneer offers an unparalleled toolkit for crafting elegant and intuitive user interfaces

- **Technologies Used:** React, Styled Components and High Charts.
- **Responsibilities:** React Engineer.

### Gateway

Gateway is an indispensable application tailored for logistics companies, offering streamlined management of warehouses and transportation operations. With Gateway, tenants gain seamless control over inbound and outbound logistics, empowering them to efficiently oversee their warehouse inventory and transportation activities. From inventory tracking to scheduling and monitoring shipments, Gateway provides a comprehensive solution for optimizing logistics processes.

- **Technologies Used:** React, Redux, ExpressJS, NodeJS, and Material UI.
- **Responsibilities:** Team Lead and Fullstack Engineer.

### DashQ

This app serves as a powerful management tool, enabling efficient appointment management and seamless sharing of inventory details with prospective clients. With DashQ, finding the perfect apartment has never been easier, thanks to its intuitive interface and robust functionality that streamline the entire process from search to closing.

- **Technologies Used:** React Native, Redux, React Native Elements, Twilio.
- **Responsibilities:** Team Lead and React Native Engineer.

## 4Sight Connect

4Sight Connect is a ground breaking React Native application that revolutionizes the trailer driver experience by enabling seamless check-in and checkout processes directly from their smartphones. Gone are the days of having to leave the comfort of their cabin to complete facility procedures. With 4Sight Connect, trailer drivers can effortlessly manage their arrivals and departures, streamlining operations and enhancing efficiency for both drivers and facility staff. This innovative solution not only simplifies logistics operations but also improves overall productivity and convenience in the transportation industry.

- **Technologies Used:** React Native, Redux, Twilio, Google Maps.
- **Responsibilities:** Team Lead and React Native Engineer.

## Argon

Argon is a sophisticated thin client device management software designed to streamline the control and administration of kiosk devices in outlets. With Argon, administrators gain the ability to remotely manage and oversee kiosk operations with unparalleled ease and efficiency. From controlling device settings to updating software and monitoring performance, Argon empowers administrators to maintain optimal functionality and security across their kiosk network from a centralized platform. By providing seamless remote management capabilities, Argon enhances productivity, reduces downtime, and ensures a seamless customer experience in outlets equipped with kiosk devices.

- **Technologies Used:** React .
- **Responsibilities:** React Engineer.

## Just Training

Just Training is a revolutionary smartphone application that connects users with top coaches from around the world, offering unparalleled access to high-quality training sessions. Whether you're looking to enhance your athletic performance, improve your skills in a particular sport, or achieve personal fitness goals, Just Training provides a diverse range of coaching expertise at your fingertips. With intuitive features and seamless user experience, this app empowers individuals to pursue their fitness aspirations from the convenience of their smartphone, making elite-level training accessible to anyone, anywhere. Say goodbye to limitations and hello to limitless possibilities with Just Training.

- **Technologies Used:** React Native, Redux and Native Base.
- **Responsibilities:** React Native Engineer.
